East Hants

▶ Neighbourhood Profiles – A Guide

With data from the 2021 Census, United Way Halifax was able to create a large number of neighbourhood profiles. These profiles can help us better understand the strengths and vulnerabilities of different neighbourhoods across HRM.

This data can be useful for United Way to help prioritize where we focus certain efforts and measure change over time. We hope it may also be useful for community organizations to help further their advocacy and policy change efforts, measure the impact of programs and services, and make informed decisions.

Data strengths and limitations

Data from the census is considered to be of very high quality because there is a high participation rate. It is extremely helpful in identifying trends, significant changes or anomalies. However, it doesn't tell the whole story.

Census data is a sum of all respondents and is not always reflective of experience. There are gaps where some people and factors are not included. For example, the number of people experiencing core housing need does not include those who are currently homeless, so we can't say that's fully the number of people who need a safe, appropriate, affordable home. Despite these shortcomings, census data can help us identify whether neighbourhoods have a comparable number of households in core housing need, or if some neighbourhoods are experiencing more or less need relative to other neighbourhoods.

The census also uses some terminology to identify people that doesn't align with how we refer to people. For example, we would rarely use the term "visible minority". And the census doesn't always categorize people in ways that fully reflect distinct populations. African Nova Scotians, for example, are not identified separately from Black Nova Scotians even though we know their experiences often differ. Additionally, some populations may be less likely to complete the census accurately for a variety of reasons such as a language barrier. All of these things are considerations to keep in mind when looking at neighbourhood data.

Every neighbourhood has strengths and weaknesses

Every neighbourhood has strengths and positive qualities, no matter what the data says. Often, neighbourhoods that have faced big challenges have stronger community bonds and relationships between residents. Even in neighbourhoods that look great on paper, there are people who struggle at one time or another. Individuals are not defined by their neighbourhood statistics, and no neighbourhood is immune to challenges.

How to read the data

Some tips on reading the data provided here:

- Look at your neighbourhood data and how that compares to the Halifax CMA. Does it look similar, or do you see big differences? Remember, a difference doesn't always indicate something is negative (e.g. a large number of rentals compared to the CMA).
- Look for multiple data points that can tell more of the story. For example, if the overall incomes for the area are low, how many young people are in your neighbourhood compared to older individuals? What do the education levels look like? Are there more single parent families?
- Look for yourself or one of your clients in the data. Think about age, education, immigration status, income etc. Do you see yourself or your client reflected in your neighbourhood? This exercise may help you better understand the data.
- Look for trends that you would expect to see, like the number of newcomers, unemployment rate or education rates. Does the data reinforce your expectations, or does it surprise you?

Glossary of Terms

CMA – Census Metropolitan Area

The larger geographic area where the census data was collected. The Halifax CMA includes Halifax Regional Municipality and the Municipality of East Hants. The CMA data are included to provide a comparison of neighbourhood-level data with the averages for the broader geographic region.

MBM – Market Basket Measure

The official measure of poverty in Canada, which is defined by the cost of a basic "basket" of goods and services. This measure includes costs like housing, food, transportation and clothing.

Not in the Labour Force

People who are of working age but are not working and not actively seeking work. This may include students, retirees, people staying home to look after children or family, seasonal workers in the off-season who aren't looking for work, and those unable to work because of a long-term illness or disability.

Core Housing Need

Households in core housing need live in unsuitable, inadequate or unaffordable housing and cannot afford alternative housing in their community.
